PROFESSIONAL SUMMARY

IT Support and Systems Administrator with hands-on remote experience managing VPS infrastructure, Docker containers, DNS configurations, and Google Workspace for a live production environment. Previously supported IT operations within a Kenyan law court during an attachment, demonstrating professionalism and reliability in a high-integrity setting. Seeking a global remote IT role where technical troubleshooting and infrastructure management skills can be applied. Open to USD/EUR/GBP compensation.

TECHNICAL SKILLS

Infrastructure & Systems:

Linux VPS Management, Docker Containers, Website Hosting & Deployment, DNS Configuration, Domain Administration, SSH Remote Access, SSL Configuration, Technical Troubleshooting

Cloud & Productivity:

Google Workspace Administration, Email Configuration (MX Records), User Account Management, Domain Verification

Web Technologies:

HTML, CSS, JavaScript, PHP

Tools & Platforms:

Git & GitHub, VS Code, Hostinger VPS, Namecheap, Docker, Google Admin Console

Soft Skills:

Problem-solving, Technical documentation, Remote collaboration, Time management, User support

PROFESSIONAL EXPERIENCE

IT & Systems Administrator (Remote) | July 2025 – Present

Confidential Organization – Kenya

- Manage VPS-hosted website infrastructure, maintaining 99.9% uptime over 6 months for a live production environment.
- Administer Docker containers for deployment and maintenance of web services, including container orchestration and updates.
- Configure and manage DNS records, domain settings, and hosting infrastructure; executed a zero-downtime DNS migration from Namecheap to Hostinger.
- Support Google Workspace for 15+ users, including email configuration, domain verification, account creation, and password resets.
- Resolve average of 10+ technical support tickets per week, with average response time under 2 hours.
- Integrated chatbot functionality into organizational website, reducing repetitive user queries by approximately 30%.
- Provide remote technical support for online systems and digital operations across multiple time zones.

IT Support Trainee (Attachment) | [Insert Month, Year] – [Insert Month, Year]

Law Court – Kenya

- Delivered first-line IT support to court staff, including hardware troubleshooting, printer setup, and software installation.
 - Assisted in maintaining network connectivity across multiple courtrooms and administrative offices.
 - Documented common IT issues and created a basic user troubleshooting guide, reducing repeat support requests by approximately 20%.
 - Supported senior IT officers with user account management and system updates during court proceedings.
-

EDUCATION

Bachelor of Science in Computer Science

Maseno University

Graduated: [December, 2025]

CERTIFICATIONS (In Progress / Completed)

- Google IT Support Certificate (in progress)
 - Linux Fundamentals (self-taught, production experience)
 - Docker Essentials (production experience)
 - AWS Cloud Practitioner (target: next 3 months)
-

PROJECTS

Chatbot Integration

Researched, selected, and embedded a third-party chatbot into an organizational website to automate common user queries.

Personal Finance Management System

Built a web-based personal finance tracker (HTML/CSS/JS) to demonstrate full-stack fundamentals.
